

ENZO SOUTO

Asa Sul, Brasília - DF, Brazil | +55 (61) 98100-7329 | enzo.ferrari.sd@gmail.com | enzofd.framer.website

PROFESSIONAL SUMMARY

Data Analyst with experience in data extraction, cleaning, integration and analysis, dashboard development and process automation. Working with Power BI, SQL, Python, ETL, PostgreSQL, Databricks and Microsoft Azure environments. Experienced in building solutions to automate routines, integrate different data sources, and generate indicators to support decision-making. Also brings prior experience in Software Quality Assurance (QA) and UX/UI Design, providing a multidisciplinary view for building data-driven solutions.

PROFESSIONAL EXPERIENCE

OLIVA E SOUZA ADVOGADOS — Data Analyst | Mar 2026 – Present

- Extraction, cleaning and analysis of data from different sources and databases.
- Development and maintenance of dashboards and indicators using Power BI.
- Building and maintaining ETL processes for data integration, transformation and delivery.
- Development of Python scripts to automate processes and operational routines.
- Querying, handling and integrating data using PostgreSQL and SQL.
- Use of DBeaver for database management, querying and analysis.
- Configuration and use of WireGuard for secure access to internal environments and resources.
- Working with environments and services on Microsoft Azure.
- Building solutions to automate data extraction, processing and refresh flows.
- Supporting the structuring and improvement of data and Business Intelligence processes.

SECOM – Communications Office of the Presidency of Brazil — Data Analyst and Development | Dec 2024 – Mar 2026

- Development of dashboards and data visualizations to support decision-making.
- Data cleaning and organization of databases.
- Integration and consumption of APIs for data collection.
- Automation of analysis routines.
- Support for the development of information visualization systems.
- **Technologies:** Python, SQL, Databricks, DBeaver, APIs, VS Code.

BRBCARD – Bank of Brasília — QA / Test Analyst | Sep 2022 – Sep 2024

- Execution of functional, exploratory and performance testing.
- Analysis of requirements and user stories.
- API testing and test automation.
- Technical documentation and application mapping.
- Mobile testing and collaboration with UX/UI teams.
- **Tools:** Jenkins, Postman, Android Studio, Kiwi TCMS, Mantis, Figma, Framer, SQL.

DF PRECATÓRIOS — Tier-1 Infrastructure Support

- Technical support for hardware and software.
- Installation and configuration of systems.
- Administration of Windows environments.

- System monitoring and remote support.

EDUCATION

MBA in Data Engineering – FIAP (Aug 2026 – Present)

Postgraduate degree in progress, going deeper into data engineering on top of the foundation built in the degree and in the analyst role.

Computer Science – UniCEUB (2021 – 2025)

Bachelor's degree focused on technology, software development and data analysis.

CERTIFICATIONS

- Google UX Design Certificate – Google / Coursera (2025)
- Figma Application – EBAC (2025)
- User Experience – FIAP (2024)

TECHNICAL SKILLS

Data & BI: Power BI, SQL, data analysis, ETL / ELT, data visualization, data integration, APIs

Programming & Automation: Python, automation scripts

Databases & Platforms: PostgreSQL, MySQL, Databricks, Microsoft Azure, DBeaver

Infrastructure & Tools: WireGuard, VS Code, Git/GitHub

Other: Software testing (QA), UX/UI Design, Figma, Postman, Framer, Miro, MS Office

LANGUAGES

Portuguese — Native • English — Fluent • Spanish — Advanced
